

## ASSETS AFFECTED

This information is only valid for 28 days from the date of issue

Please note that there are **Gas Mains or Services** in the vicinity of your intended work, as generally illustrated on the attached map. There may also be other mains or services at the location. For an explanation of the map, please see the legend attachment and read the important information below.

---

*Please note that you have duty of care to ensure that Jemena's assets are not compromised or damaged during any digging, future development or construction work.*

---

### Excavation Guidelines:

It is essential that the location of gas pipe/s are confirmed by carefully pot-holing by hand excavation prior to proceeding with mechanical excavation in the vicinity of gas pipes. If you cannot locate the pipe, contact the local depot.

#### Important Information:

1. The enclosed plans have been prepared solely for the use of Jemena Gas Networks (NSW) Ltd and Jemena Asset Management Pty Ltd (together "Jemena") and show the position of Jemena's underground gas mains and installations in public gazetted roads. If the enclosed plans show gas assets located on private property or other third party property, these are approximate locations.
2. There may be underground assets owned by other utilities in the vicinity of your work and it is your responsibility to identify and locate such assets.
3. The plans may show the position of underground mains and installations relative to fences, buildings and other structures, as they existed at the time the assets were installed and may not have been updated to take account of any subsequent change in the location or style of those features. Depth of underground assets may also vary as a result of changes to road, footpath or surface levels subsequent to installation.
4. While Jemena takes all reasonable care to ensure the accuracy and completeness of the information provided, it makes no warranty as to the accuracy or completeness of the enclosed plans and does not assume any duty of care to you nor any responsibility for the accuracy, adequacy, suitability or completeness of the plans or for any error or omission. It is intended to be indicative only and must not be solely relied upon when undertaking underground works.
5. Except to the extent that liability may not be capable of being lawfully excluded, Jemena, its employees, agents, officers and contractors will not be liable to any person for loss or damage (including indirect and consequential loss or damage) which may be suffered or incurred in connection with the provision of this information.
6. Persons excavating or carrying out other earthworks will be held responsible for any damage caused to Jemena's underground mains, service lines and equipment. In accordance with the *Work Near Underground Assets – Guide* published in 2007 by Work Cover Authority\*, Jemena recommends that you carry out potholing by hand to accurately confirm the location of gas mains and installation prior to commencing excavations.

## Network Mains

|                                                                                     |                                                                                       |
|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|    | Proposed New Main (coloured as per kPa)                                               |
|    | Proposed Isolate (coloured as per kPa)                                                |

## Gas Services

|                                                                                     |                               |
|-------------------------------------------------------------------------------------|-------------------------------|
|  | Gas service – coloured by kPa |
|  | Serviced Site indicator       |

Jemena has created service pipe features programmatically based on known pipe characteristics and cartographic principles. They may provide guidance to identify assets whilst in the field in addition to existing processes.

## Network Assets

|                                                                                   |                                                     |
|-----------------------------------------------------------------------------------|-----------------------------------------------------|
|  | Siphon                                              |
|  | Network Valve                                       |
|  | High Pressure Main Line Valve (>=1050kPa)           |
|  | High Pressure Automatic Line Break Valve (>1050kPa) |
|  | Boundary Regulator Set (=<1050kPa)                  |
|  | Distribution Regulator Set (=<1050kPa)              |
|  | High Pressure Regulating Station (>1050kPa)         |

## Annotations

### Pipe and Conduit Material Codes

|      |                     |      |                          |
|------|---------------------|------|--------------------------|
| NY   | Nylon               | NB   | Nominal Bore – Cast Iron |
| PE   | Polyethylene        | ST   | Steel                    |
| P/PL | Plastic (undefined) | C/CO | Copper                   |
| PVC  | Polyvinyl Chloride  |      |                          |

### Pipe code combinations and dimension references

|              |                                                                    |
|--------------|--------------------------------------------------------------------|
| ⑥NB 50MM NY  | 50mm Nylon main inserted into 6 inch (Nominal Bore) Cast Iron pipe |
| ⑤0MM 32MM NY | 32mm Nylon main inserted into 50mm Steel pipe                      |

~1.5 Distance (in metres) of main from Boundary Line (MBL)

|      |                                                                  |
|------|------------------------------------------------------------------|
| MBK  | Distance in Metres Back of Kerb                                  |
| MKL  | Distance in Metres from Kerb Line                                |
| MEBL | Distance in Metres from Eastern Boundary Line (North/South/West) |
| MCL  | Distance in Metres from Centre Line of Road                      |
| MFL  | Distance in Metres from Fence Line                               |

Distance (in metres) of service from side Boundary where the service pipe crosses from the road reserve into the private lot  
Service placed towards left or right boundary  
Service pipe size & material where known

For connected sites with insufficient asset details, service is shown down the centre of the lot with no attributes plotted
