Subject: URGENT - Request for consent to enter land - RCA Australia

Good afternoon,

City of Newcastle (CN) has engaged RCA Australia to prepare a report that may provide high level advice and guidance on individual lots within the Danger Area. Property owners will still be responsible for obtaining specific guidance for their land and this will require specific investigation and assessment.

This lot specific report is to address;

- a summary of the status of ground conditions for each lot (e.g. Condition of surface and subsurface and potential depth of failure place), and
- constraints to reoccupation or development on the lots, and
- any potential to mitigate or address the identified constraints to each lot in isolation to any other works within the Danger Area.

CN proposes to release the lot specific report to each property owner at the same time as the geotechnical investigation report.

Please provide written consent by return email before close of business Friday 30 January to permit RCA Australia to enter your land. Geotechnical engineers plan to enter your lot from early Monday 1 February onwards to conduct an inspection. Physical entry to homes and structures is not being sought. If you have any concerns or questions, please contact Mel Gore or myself to discuss. If you do not wish to provide consent, your decision is respected and no entry will be made to your land, nor will a report specific to your lot be prepared.

Kind regards

Wade Berryman | Emergency Management Coordinator
