In response to your enquiry, Sequence No: 260744336 - Unfortunately the search area you have requested is too complex to provide you with plans. Ausgrid BYDA service has restricted the size of enquiries based on the complexity of the assets and the size of the file(s) to be produced. This restriction provides an efficient, automated system that has improved the response time for most BYDA requests.

Please resubmit a new and refined request through Before You Dig Australia.

This search is based on the geographical position of the dig site as denoted in the Before You Dig Australia caller confirmation sheet and an overview is provided:
